SIS CERTIFICATIONS

WE DO NOT SELL, WE CERTIFY!

I am thrilled to share some momentous news with all of you. It is with great pride and pleasure that I announce SIS Certifications latest achievements in the realm of ISO certifications. We have achieved two remarkable milestones that underscore our commitment to excellence and unparalleled service in the industry.

Firstly, I am delighted to inform you that SIS Certifications is now accredited by the International Accreditation Service (IAS) for ISO 27001:2022 Certification. This accreditation serves as a testament to our dedication to maintaining the highest standards of information

security management. By obtaining this prestigious accreditation, we have solidified our position as a leading certification body, providing top-notch services that guarantee the safety and integrity of our client's information assets. But there's more! I am equally proud to share that **SIS Certifications is the only ISO Certification body in India to be accredited by IAS for ISO 41001:2018 Certification.**

These accreditations from IAS highlight our dedication to providing world-class services to our clients, further solidifying our position as a leading ISO certification body not just in India but on the global stage. We remain committed to upholding the highest ethical standards and ensuring that our clients receive the best possible service and value. As we move forward, we pledge to continue enhancing our services and expanding our scope to serve you even better.

Thank you for your continued support and we look forward to embarking on many more successful ventures together.

Arunendra Dvivedi
(Managing Director)

HIGHLIGHTS

We Do Not Sell, We Certify!

**INDUS Tech Expo
2023 Machine tools
and Automation Expo
which was held on
05th to 07th July
2023 at Ark
Convention Center,
NH 87, Near Bagath
Singh Degree
College, Rudrapur,
Uttarakhand, India.**

INDUS-tech Machine Tools & Automation Expo Rudrapur is a one-stop destination to display industrial technologies and innovations focusing on the manufacturing sector.

INDUS-tech Machine Tools & Automation Expo Rudrapur is purely a business-to-business exhibition that would have the presence of delegations of industries representing various industrial sectors like automobiles, auto components, aerospace, general engineering, capital goods and many more... Earlier Editions of INDUS-tech, Bhiwadi were very successful and were appraised by the exhibitors as well as by the visitors for its international standards while the footfall was very potential worth and there was a ROI to the participating companies.

Sharing a Little Heartfelt Appreciation with Exhibitors

This Expo is a perfect platform to demonstrate the latest and new technologies introduced in the field of metalworking machinery, low-cost automation, safety goods material handling and quality control systems and equipment, together with off-the-shelf production aids, accessories, consumables & consultancy.

We Do Not Sell, We Certify!

SIS Certifications is NOW accredited by IAS for ISO 27001:2022 Certification

NEWS

SIS Certifications Scaled its Operations with ISO 27001:2022 Certification and Helps Business Organizations Ensure a More Effective Information Security System.

SIS Certifications is delighted to announce its most considerable achievement in Information Security Management Systems (ISMS). The International Organization for Standardization (ISO) has developed ISO 27001 Certification to ensure the data security and privacy of clients, customers, and other stakeholders.

The ISO keeps updating the provisions of various management system certifications to cope with ever-changing business needs and requirements. The ISO/IEC 27001 certification was recently updated in 2022, and the new version is known as ISO/IEC 27001:2022 certification. Annex A controls are an integral part of the ISO 27001 standard, and the latest version significantly changed 114 security controls.

Non-Conformance in the Manufacturing Industry

Quality control in Manufacturing is crucial to a product's performance and profitability. Without quality control, faulty products can drive up costs through costly rework and repairs and potentially compromise safety. There are a lot of manufacturing non-conformance that needs to be spotted, and how to deal with it.

What exactly is Non Conformity?

Any component or product that does not satisfy (or conform to) the specification is referred to as a non-conformance (or nonconformity/non-conformance).

Regulations and standards established by the industry itself may also be broken by non-conformance. In this situation, a third-party authority (like the FDA) may control the acceptable levels of various food products. For instance, the FDA might forbid the use of specific components or substances in a range of foods, dietary supplements, or medical devices. Or, they might only permit a specific quantity in the items. Before a manufacturer is permitted to sell their products on the open market, they must first submit samples for inspection and testing. Re-testing is necessary, and if non-conforming goods are discovered, corrective action is needed.

Artificial Intelligence in Defence Sector

WHAT IS ISO STANDARD FOR ARTIFICIAL INTELLIGENCE?

ISO/IEC 23894 offers strategic guidance to organisations across all sectors for managing risks connected to the development and use of AI. It also provides guidance on how organisations can integrate risk management into their AI-driven activities and business functions.

On 11th June 2022, India witnessed its first-ever Artificial Intelligence in Defence exhibition in Delhi. The Union Defence Minister, Rajnath Singh, launched 75 newly developed AI products/technologies to showcase India's power in the field of Artificial Intelligence.

In modern warfare, technology plays a significant role. Hence, it becomes necessary for every country to integrate Artificial Intelligence within the existing technology and battlefield practices.

Every country wants to get benefitted from the goldmines of benefits Artificial Intelligence offers; however, we cannot sideline the danger it poses. ISO Certification can eliminate and control the threats of AI by implementing an effective management system.

Data Security: Artificial Intelligence is smart enough to make decisions without minimal human interference and train itself. Moreover, it increases its accuracy with time using the enabled data. AI is deprived of human features like ethics and morality, and in the long run, it can misuse stored data.

BUSINESS NEWS
