WE DO NOT SELL, WE CERTIFY

I am honoured to represent our ISO certifications body and share with you the message of our commitment to quality and excellence.

As we continue to navigate through these challenging times, I am reminded of the importance of staying connected with one another. Through our monthly newsletter, we aim to keep you informed about the latest developments in our organization, as well as share relevant insights, and industry news to provide updates on our ISO certification journey. As a company, we are committed to delivering quality services to our customers while maintaining high standards of environmental responsibility and safety.

International Accreditation Service is actively working on identifying and halting the scammers, it is also the duty of every responsible individual to be well acquainted with the certification bodies accredited by the International Accreditation Service (IAS). There are numerous businesses on the market that certify themselves without going through any formal procedures and simply obtain certification to promote this to their customers.

"There are no shortcuts or simple routes to success." Your organization will advance if you take the correct course. Organizations must select the certification bodies mentioned by the International Accreditation Service (IAS) in order to achieve exceptional results and an unavoidable reputation.

Over the past month, we have made significant progress toward achieving our goals. Our team has been working tirelessly to deliver high-quality services to our clients, and I am proud of the dedication and commitment they have shown.

At our core, we believe in providing our clients with the best possible service and solutions to help them achieve their goals. We understand that ISO certification is not just a mere badge of honor, but a critical aspect of a company's success in the global market. As such, we have dedicated ourselves to ensuring that our certification process is thorough, impartial, and transparent, to provide our clients with the highest level of assurance.

We strive to maintain the highest level of professionalism, integrity, and ethical standards in all our operations, and we are continuously improving our processes to meet the evolving needs of our clients. Our team of experts is committed to working closely with our clients to understand their unique needs and provide tailored solutions to help them achieve their goals.

I would like to take this opportunity to thank our readers for their continued support, and I encourage you to share your feedback and suggestions with us. Your input helps us to improve and deliver a newsletter that is relevant and valuable to you.

**DIRECTOR'S
MESSAGE**

UK Government selected BSI to Certify G7 Summit and COP26 Events

World Television Ltd. Received Award of ISO/IEC 27001:2013

Africa Prudential achieved more ISO Certifications

MANCH the SaaS-based zero coding platform has now achieved ISO 27001 certification.

BSI received official global accreditation status from ANSI-ASQ and UKAS

Renewal of ISO 27001:2013 Certification for Andromeda Loans

ANAB provided ISO 27001 accreditation to TUV SUD America

MAKE SURE TO OPT A RIGHT ISO CERTIFICATION BODY FOR YOUR ORGANIZATION

None will make you aware of treachery except the authentic information you are updating yourself with. Recently, it is found that in the surprise visit by the International Accreditation Service (IAS) many Certification body were caught being irresponsible in their processes. Halting their operations, International Accreditation Service (IAS) has done its job. Accreditation is an intensive responsibility as it is a verification where organization is being checked for following the certain guidelines to meet the established quality standards and perform conformity tasks that includes inspection, testing, certification and the like.

APOLLO TELEHEALTH BECOMES THE FIRST TELEMEDICINE NETWORK TO ACHIEVE ISO 13131:2021

British Standards Institution (BSI) presented the certification of ISO 13131:2021 to Apollo telehealth, a multi-speciality telemedicine network. Apollo telehealth has now become the first telemedicine organization to back this certification.

Over the years, Apollo Hospitals have signed MoUs with several government bodies across the country that focus on improving health care and awareness programs. Apollo hospitals groups released a PR which said that the certification provides direction with a focus on the quality and risk management methods required to define guidelines for distinct remote health and care services and it belongs to a class of standards that provides flexible, general guidelines that support innovation in healthcare.

BSI PUBLISHED A NEW STANDARD TO ENABLE BETTER DATA MANAGEMENT FOR AUTOMATED VEHICLE TRIALS

British standards council (BSI), the UK's national standard body introduced the first consent standard to enable data collection and management for automated vehicle trials. The standard was backed by the government's Centre for Connected and Autonomous Vehicles (CCAV) and is the fourth publication from the CAV Standards Programme. It got delivered in conjunction with the department of transport, energy and Industrial Strategy (BEIS). Innovate UK and Zenic. This standard is mainly for incident investigation.

SIGNIFICANCE OF ISO 41001 FOR INDUSTRIES GLOBALLY

ISO 41001:2018 is the internationally recognised standard used worldwide related to the Facility Management system(FMS). The standard offers a framework for managing facilities effectively and economically, and it addresses every facet of facility management, from planning and design to operation and maintenance. Facility Management Systems may assist facility managers in enhancing operational effectiveness, resource allocation optimisation, safety and security enhancement, and regulatory compliance connected to building operations.

ISO 41001:2018 is relevant to all organisations regardless of sector, size or location. The best practices from throughout the world are examined and reported to develop the ISO 41001:2018 certification. This standard gives businesses a wide range of options for action that will enable them to deliver strategic planning at new standards, create tactics, and enhance new plant management.

ISO 41001:2018 helps industries ensure that their facility management processes are efficient and cost-effective. Additionally, it provides guidance on how to improve existing processes and ensure compliance with legal requirements. By implementing ISO 41001:2018, industries can demonstrate their commitment to providing quality services while also improving safety standards and reducing operational costs.

This makes it a valuable tool for any industry looking to improve its facility management operations on a global scale. Adopting this standard can bring numerous benefits to industries, including improved efficiency in managing resources, better communication between departments, and increased customer satisfaction.

However, there are several challenges related to adopting and implementing ISO 41001 in different organizations. These include the cost of implementation, lack of understanding about the standard, difficulty in measuring compliance, lack of resources to implement it effectively, and resistance from employees. Overall, having effective Facility Management Systems in place is essential for any industry looking to remain competitive in today's global market.

Some of the core benefits of ISO 41001 for industries globally

- Industries may reduce facility-related risks by identifying and addressing them with ISO 41001, which can help avoid mishaps, injuries, and other occurrences.
- A facility management system standard eliminates trade restrictions and opens up the global market. It demonstrates a company's capacity to integrate global best practices into its management system.
- The standard provides guidance on developing policies and procedures that all stakeholders can use in the organisation. It provides higher efficacy and efficiency, which results in greater cost savings for the organisation.
- It guarantees continued competitiveness on a national and worldwide scale.
- It helps an organisation to adopt tools and approaches to manage the constantly evolving trends in infrastructure development.

Conclusion

The importance of ISO 41001 lies in its ability to help organizations improve their facility management processes and reduce costs associated with managing their facilities. This leads to establishing a culture of increased productivity and increased profitability for businesses. It also helps in reducing environmental impact by minimizing energy consumption and waste production. It makes sure that organizations ensure compliance with local regulations and industry standards. Additionally, it can help organizations to improve their growth by providing better services and improved safety measures.
