DIRECTOR'S MESSAGE

March 2026

www.siscertifications.com

Message from Director
Mr. Arunendra Dvivedi

Dear Team,

As we close March and step into FY 2026–27, this is a moment to reflect on our certification achievements while building momentum for what lies ahead, even amid global uncertainties. The ongoing Gulf situation highlights the value of IAS-accredited bodies like SIS Certifications, where compliance is demonstrated—not assumed—through frameworks like SOC 2 Type 2 with its 6–12 month observation period, and BCMS (ISO 22301), ensuring business continuity during disruptions.

My recent engagements across GCC markets reinforced this. Stakeholders across financial and industrial sectors are actively seeking accredited certifications in cybersecurity (ISO 27001), quality management, and emerging AIUC-1 standards for AI governance. These interactions reflect a clear shift toward credible audits and certifications that can withstand regulatory scrutiny and market pressures

From a business perspective, March has been strong. We've seen growth in certifications issued, expanded outreach across Gulf hubs, Nigeria, and the Philippines, and strengthened client trust through our broadened IAS accreditation scope across 20+ standards. We've also streamlined audit processes while helping clients align with global benchmarks that build resilience.

As we move into FY 2026–27, our focus remains on driving client success through innovation, auditor excellence, and technology integration, including AIUC standards.

My sincere thanks to our auditors, clients, and partners for their continued trust.

Wishing you all a strong close to March and a successful new financial year.

PayYantra Innovations Private Limited demonstrates Information Security with ISO/IEC 27001:2022 Certification

Warmest congratulations to PayYantra Innovations Private Limited for successfully achieving IAS-accredited ISO/IEC 27001:2022 Certification for Information Security Management System (ISMS).

ISO/IEC 27001 enables businesses to strengthen information security, protect sensitive data, and reduce risks of breaches. It builds customer trust, ensures regulatory compliance, and improves overall

governance. By implementing structured security controls, organizations enhance resilience, maintain business continuity, and gain a competitive advantage in an increasingly data-driven and risk-prone environment.

PayYantra Innovations Private Limited Strengthens privacy security with ISO/IEC 27701:2019 Certification

Warmest congratulations to PayYantra Innovations Private Limited for successfully achieving IAS-accredited ISO/IEC 27701:2019 Certification for Privacy Information Management System (PIMS).

ISO/IEC 27701 helps businesses properly collect, store, use, and delete personal information to reduce data breach risks. The standard is a proof of strong privacy

YOUNG PIPES Achieves ISO 9001:2015 Certification, Reinforcing Its Focus on Quality and Customer Satisfaction

YOUNG PIPES has achieved ISO 9001:2015 Quality Management System (QMS) certification following an audit. The achievement of ISO 9001 Quality Management System signifies YOUNG PIPES' commitment to the highest standards of quality practices across all its organizational levels.

Aside from quality practices, ISO 9001 signifies a focus on customer satisfaction and continual improvement at every level of the organization.

Manifold e-Connect Ltd. Achieves ISO 9001, 14001, and 45001 Certifications

With the achievement of ISO 9001:2015, ISO 14001:2015, and ISO 45001:2018 certifications, Manifold e-Connect Ltd. has strengthened its approach towards quality, environmental responsibility, and workplace safety. It symbolizes that the company is not only focused on producing high-quality products, but also prioritizes workplace safety and environmental sustainability. With these standards in place, Manifold e-Connect Ltd. will be able to improve its operations while reducing risks with better delivery outcomes.

ISO 9001, ISO 14001, and ISO 45001 provide a structured framework for companies to manage their operations across various areas. ISO 9001 supports quality excellence, making sure the processes are defined, and ISO 14001 identifies activities that impact the environment and takes steps to reduce the impact. ISO 45001 focuses on identifying workplace risks and preventing accidents by improving safety practices. Over time, these standards help companies create a balanced system, where quality, safety, and environmental care are emphasized.

APISHA PACK PRIVATE LIMITED Achieves ISO 9001:2015 Certification

APISHA PACK PRIVATE LIMITED has successfully achieved ISO 9001:2015 certification, reflecting its commitment to maintaining excellence in the quality of its products and services. The adoption of this standard displays the company's commitment to operational excellence, quality assurance, and building customer trust.

Warm congratulations to APISHA PACK PRIVATE LIMITED on this achievement. This certification reflects the company's mission to maintain quality standards.

CAREAPPS LIMITED Achieves ISO/IEC 27001:2022, Strengthens Information Security Framework

CAREAPPS LIMITED has successfully been certified with ISO/IEC 27001:2022 certification. It reflects the company's focus on building reliable and well-structured digital solutions. This achievement highlights the company's emphasis on structured processes, customer satisfaction, and continual improvement across its operations. Embedding ISMS across all its processes, CAREAPPS LIMITED reflects its commitment to safeguarding data and ensuring regulatory compliance.

About ISO 27001:2022

ISO/IEC 27001 strengthens a business management system by embedding information security into everyday operations. It protects sensitive data, reduces cyber risks, and ensures regulatory compliance, minimizing legal and financial exposure. The standard improves process control, accountability, and risk-based decision-making across departments. It also builds customer and stakeholder trust, enhances brand credibility, and supports business continuity.

uCertify Training & Learning Pvt. Ltd. achieves ISO 9001:2015 Certification

uCertify Training & Learning Pvt. Ltd. has successfully achieved ISO 9001:2015 certification. This certification displays the company's commitment to maintaining high-quality in its processes and delivering reliable online learning solutions to its users.

Warm congratulations to the team of uCertify Training & Learning Pvt Ltd. on the successful implementation of ISO 9001:2015 (Quality Management System).

Known as the foundation of quality and excellence, ISO 9001, a globally recognized certification displays the company's commitment to customer satisfaction and continuous improvement.

Strengthening Quality Management and Service Excellence

ISO 9001:2015 is a globally recognized standard that supports creating systems for managing work in organizations. The standard helps companies improve in the way they operate through clauses 4 to 10. Companies providing digital learning need this standard to ensure that the learning provided is not only of high quality but also meets the expectations of the learners, while providing them with post-learning support when required. The standard also covers the labs and learning processes, so the learners receive reliable educational experiences.

ISO Certification in Lagos: Turning Economic Momentum into Sustainable Growth

Lagos and Abuja sit at the center of Nigeria's economic and administrative power, attracting multinational investors, amid economic growth that is accompanied by rising expectations around governance, transparency and compliance.

In such a high-growth market with increasing government oversight and growing business expectations, organizations are widely expected to adopt structured management systems and global best practices. ISO certifications in Lagos and Abuja provide a reliable framework that meets international partners' expectations, while enabling businesses to compete confidently across both the Nigerian and global market.

Against this backdrop, Lagos emerges as the focal point of Nigeria's commercial activity, while Abuja serves as the country's administrative and regulatory center, making ISO certification equally relevant in both cities.

Most organizations today have AI policies. Very few have a way to prove that their AI agents actually behave as intended.

As enterprises accelerate the deployment of autonomous AI agents—from copilots in customer service to decision engines in finance and operations—CISOs and compliance leaders are confronting a familiar problem in a new form: how do you assure something that learns, adapts, and acts with increasing independence?

Existing frameworks provide part of the answer. ISO/IEC 27001 secures information, ISO 9001 drives process quality, ISO 14001 and ISO 45001 anchor environmental and workplace responsibility, while ISO 42001 and NIST AI risk frameworks introduce governance for AI systems. But none of these were designed specifically for autonomous, decision-making AI agents operating in dynamic environments.

This is where AIUC-1 (Artificial Intelligence–Enabled Universal Certification) emerges—not as a replacement, but as a specialized AI-agent assurance layer built to extend these standards into the agentic AI era.

While headlines focus on missiles and markets, something quieter is holding the Gulf together right now.

Renewed tensions around Iran and the Strait of Hormuz in 2026 have put familiar pressures back on the table: disrupted supply chains, rising insurance costs, unpredictable energy prices. For many businesses operating in the region, it feels like 2019 — except the stakes are higher and the tolerance for disruption is lower.

But a clear divide is emerging.

Some organisations are scrambling. Others are operating with surprising calm. Leaders in the second group are not smarter or better resourced. They made different decisions — quieter decisions — before the pressure arrived.

The difference isn't luck. It's structure.

When the system is tested, structure is what holds

Companies that embedded ISO standards before the current volatility — ISO 22301, ISO 9001, ISO 14001, ISO 45001, ISO/IEC 27001 and 27701 — are not reacting to this moment. They are executing plans they have already tested.
